English and B2 French.

CAREER RELATED EXPERIENCE

ROGERS COMMUNICATIONS –

- Software Developer
  JUNE 2023 – PRESENT
  As the prime on the front-end portal of the Serviceability and Address Management Application, I delivered new features to the application ensuring responsive design, user-centric interfaces and optimised performance, as well as collaborating with the back end team to integrate RESTful APIs. I have been responsible for building new GUIs including requirement gathering, designing, solutioning to development as well as training new team members on the front-end. Technologies: ReactJS, Redux, TypeScript, Node JS, Github, SQL

- New Grad Leadership Program
  MAY 2022 – JUNE 2023
  As part of the New Grad leadership program, I joined three teams throughout the year; I worked in developing internal automations in python, creating dashboards displaying key performance indicators in Splunk and developing for front end web applications used by technicians in the field.
  Technologies: Python, Splunk, React JS

CAE – Software Developer Healthcare
SEP 2021 – DEC 2021
As part of the Mixed Reality Squad, I developed features for healthcare simulations in virtual reality using the Oculus. I was responsible for developing the teaching assistant feature that guided the patient through the healthcare process including its movement in the virtual space and UI popups . I provided additional work creating some assets for the scene in Blender and Substance Painter.
Technologies: C#, Unity, GitHub, Blender, Substance Painter, DevOps

UBISOFT – CRM Front End Assistant Web Developer
MAY 2020 – DEC 2020
As part of the CRM team worked closely with brand, graphic designers and integrators to build dynamic emails for players. In September 2020, as the senior web developer I was asked to train new team members in HTML coding emails for Salesforce.
Technologies: HTML/CSS, Salesforce Marketing Cloud AmpScript, Jira, Perforce, Excel, Photoshop

HACKCONCORDIA – Director of Design
AUG 2019 – FEB 2020
As part of the HackConcordia Executive team I worked to organize the hackathon ConUHacks. I have worked closely with the community, tech and internal teams to make the social media posts for the organization, create the ConUHacks website as well as swag for participants items such as t-shirts and enamel pins.
Technologies: Adobe Photoshop & Illustrator
